7	13	Warm	cold	B
8	13	heavy	light	A
9	13	can match	cannot match	A

I've removed title and choice titles from decision_info to practice normalization
-I've removed fields that were redundant since 1 to 1 connections were present
-Privacy was removed from user info and public sharing option is given per decision instead at the time of completion
-ADDED PRIMARY KEY ON TITLE AND CHOICE FOR NORMLIZATION but honestly I don't think I need it
